clandestine lab operators are not the mad scientists whose genius keeps them pent up in the laboratory contemplating elaborate formulas and mixing exotic chemicals in fact their equipment is usually simple their chemicals household products and their education basic most of the time the elements at the scene are perfectly legal to sell and own

the public outcry for a return to moral education in our schools has raised more dust than it's dispelled building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children's moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community in such an environment children learn to work together to listen to one another to build on one another's ideas to probe assumptions and different perspectives and ultimately to think for themselves advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions he makes liberal use of actual classroom dialogues to illustrate children's remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility he also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers the result is a rich and insightful work that provides real hope for the future of our children and their moral education

DNS and BIND tells you everything you need to work with one of the Internet's fundamental building blocks the distributed host information database that's responsible for translating names into addresses routing mail to its proper destination and even listing phone numbers with the new ENUM standard this book brings you up to date with the latest changes in this crucial service the fifth edition covers BIND 9.3.2 the most recent release of the BIND 9 series as well as BIND 8.4.7 BIND 9.3.2 contains further improvements in security and IPv6 support and important new features such as internationalized domain names ENUM electronic numbering and SPF the sender policy framework whether you're an administrator involved with DNS on a daily basis or a user who wants to be more informed about the Internet and how it works you'll find that this book is essential reading

topics include what dns does how it works and when you need to use it how to find your own place in the internet s namespace setting up name servers using mx records to route mail configuring hosts to use dns name servers subdividing domains parenting securing your name server restricting who can query your server preventing unauthorized zone transfers avoiding bogus servers etc the dns security extensions dnssec and transaction signatures tsig mapping one name to several servers for load sharing dynamic updates asynchronous notification of change to a zone and incremental zone transfers troubleshooting using nslookup and dig reading debugging output common problems dns programming using the resolver library and perl s net dns module
