the present book is meant for the students who opt for a course in environmental chemistry with laboratory work as a component of the course spread in 72 experiments the analyses of soil water and air have been described in a simple manner so that most of these experiments can be conducted even by the beginners in this subject the principles involved preparation of the reagents and the procedures are described for each experimental method the authors hope that this manual would prove to be useful in laboratories where soil water and air are routinely tested

medicinal chemistry laboratory manual investigations in biological and pharmaceutical chemistry responds to a critical classroom need for material for directed laboratory investigations in biological and pharmaceutical chemistry this manual supplies 55 experiments in 18 major subject areas including carbohydrates lipids and proteins in biochemistry tannins balsams and alkaloids in natural products areas and analgesics steroids and anesthetics in pharmaceutical chemistry

experimental organic chemistry laboratory manual is designed as a primer to initiate students in organic chemistry laboratory work organic chemistry is an eminently experimental science that is based on a well established theoretical framework where the basic aspects are well established but at the same time are under constant development therefore it is essential for future professionals to develop a strong background in the laboratory as soon as possible forming good habits from the outset and developing the necessary skills to address the challenges of the experimental work this book is divided into three parts in the first safety issues in laboratories are addressed offering tips for keeping laboratory notebooks in the second the material the main basic laboratory procedures preparation of samples for different spectroscopic techniques microscale green chemistry and qualitative organic analysis are described the third part consists of a collection of 84 experiments divided into 5 modules and arranged according to complexity the last two chapters are devoted to the practices at microscale synthesis and green chemistry

seeking alternatives to traditional organic chemistry organizes lab course coverage in a logical and useful way features a valuable chapter on green chemistry experiments includes 84 experiments arranged according to increasing complexity

this new edition of the beran lab manual emphasizes chemical principles as well as techniques the manual helps students understand the timing and situations for the various techniques the beran lab manual has long been a market leading lab manual for general chemistry each experiment is presented with concise objectives a comprehensive list of techniques and detailed lab intros and step by step procedures

green chemistry involves designing novel ways to create and synthesize products and implement processes that will eliminate or greatly reduce negative environmental impacts providing educational laboratory materials that challenge students with the customary topics found in a general chemistry laboratory manual this lab manual enables students to see how green chemistry principles can be applied to real world issues following a consistent format each lab experiment includes objectives prelab questions and detailed step by step procedures for performing the experiments additional questions encourage further research about how green chemistry principles compare with traditional more hazardous experimental methods
